

Machinery Diagnostics Institute

MDI – Machinery Diagnostics Institute are worldwide professionals providing class room and virtual online interactive technical trainings, based in Queensland – Australia.

Teaching staff are real practitioners specialized in delivering knowledge of Machinery Diagnostics techniques from basic levels to the most advanced.

Helping technical teams to develop their knowledge, knowing how to best utilize the most advanced diagnostics techniques and improve site performance through delivering accredit trainings and guiding them to the best practices.

Vibration Analysis

Thermal Imaging

Machinery Lubrication

Ultrasound Testing

Turbo-Machinery Analysis

Machinery Balancing

Shaft Alignment

Asset Reliability

OUR PARTNERS

MDI - Machinery Diagnostics Institute
The training provider for Turbomachinery
Data Collection training course and
certification

Turbomachinery Data Collection

A Three-day course intended to provide all technical information from basic to the most advanced levels of turbo-machinery data collection

This engaging course by MDI will equip participants with comprehensive training on utilizing multichannel analyzers such as BN ADRE 208, ADRE 408, and Alta Solution AS1250FE.

Training Main Topics:

1. Evaluation of testing sensors and their practical applications.
2. Familiarization with data collection devices.
3. Understanding connections and their configurations.
4. Software and Database Configuration.
5. Techniques for effective data collection.
6. Interpretation and analysis of Steady State plots.
7. Analysis and comprehension of Transient State Plots.

Online Interactive Course

Attend the training anywhere worldwide, without traveling expenses

Hardcopy References

Acquire hardcopy material – textbook – containing all course slides

Practitioner Instructor

Gain wide practical experience based on hundreds of technical cases

Practical Course

The most practical course to learn all the tricks you need to do data collection
